

## Anatomical Pathologists

IDEXX Laboratories, Inc. is a leader in companion animal health, serving practicing veterinarians around the world with innovative, technology-based offerings, including a broad range of diagnostic products and reference lab services and practice management systems. IDEXX products enhance the ability of veterinarians to provide advanced medical care and to build more economically successful practices. The IDEXX Reference Laboratory Division has 40 locations worldwide to include Australia, Canada, Europe, Japan, South Africa and the US. As a leader in comprehensive veterinary diagnostics, we employ over 80 veterinary pathologists and internal medicine specialists. IDEXX offers its customers comprehensive, innovative testing and exceptional customer service. Laboratory services include haematology, biochemistry, cytology, histopathology, microbiology, serology, immunology, endocrinology, and molecular biology.

---

**We are currently seeking a full-time Anatomical Pathologist to be located in our laboratory in Wetherby, West Yorkshire.**

Duties would broadly include:

- Providing clients with diagnostic evaluation and consultation in the area of anatomic pathology, including both microscopic and gross evaluation of surgical biopsy specimens.
- Consulting with clients regarding interpretation of pathology reports and other laboratory data, and responding to client inquiries.
- Partnering with the Head of Anatomic Pathology and the Laboratory Operations Manager to ensure quality of results in the laboratory and working in conjunction with other anatomic and clinical pathologists to allow optimum turn around time of client submissions.

The pathologist is expected to meet caseload and turnaround expectations and to be accessible for client consultations during regular working hours. A high level of importance is placed on quality, service, timeliness, and client satisfaction. The pathologist is also expected to promote the growth of IDEXX Laboratories by actively participating in pathologist meetings and professional contact with clients.

Suitable applicants will have postgraduate experience in anatomic pathology, DVM (or equivalent) plus board certification (or eligibility) with either the American or European Colleges of Veterinary Pathology.

There is a strong, collaborative relationship between our pathology team and we encourage and value diversity. We have a commitment to excellence, continued training and professional development as part of the worldwide team of IDEXX pathologists. In addition to an enviable reputation for laboratory analytical quality, expertise and experience, we offer the opportunity for you to develop, extend and integrate your diagnostic skills across the sphere of laboratory medicine.

**To apply, please send a covering letter and CV by post to Samantha Little, HR Manager, IDEXX Laboratories Ltd, Grange House, Sandbeck Way, Wetherby, West Yorkshire, LS22 7DN, UK or by e-mail to [UKHR@idexx.com](mailto:UKHR@idexx.com); or telephone +44 (0) 1937 544000 for further details.**
