

GlaxoSmithKline

PATHOLOGY TRAINEE/RESIDENT INTERNSHIP IN PHARMACEUTICAL INDUSTRY

- GSK Safety Assessment (SA) UK Pathology department is offering short duration internships in veterinary and clinical pathology
- The program aims to provide an introduction to the toxicological pathologist's daily duties (including technical, scientific and communication) and an understanding of how pathology data fit into SA's contributions to drug development. There may also be the possibility to gain some clinical pathology experience or contribute to a short project.
- The position will involve exposure to short term toxicological studies (including lone reading and review with experienced pathologists), training material (EPSR slides), special histopathological techniques (e.g. electron microscopy and immunohistochemistry) and data handling experience (comprehensive pathology style). An interest in toxicological pathology as a career, strong motivation, a proactive approach will be required from successful applicants.
- This program is offered on a 4 to 8 week basis in the second half of 2012 and is intended for veterinary graduates currently in a pathology or clinical pathology PhD, training or residency programme.
- Some financial assistance may be available.
- For further information do not hesitate to contact us by email. To formally apply, please return by email CV and supporting letter to UK Internship at oax78352@gsk.com by **June 1st 2012**
